HVAC and BEMS Maintenance

“SIRUS offers a 24hr emergency callout service on top of the annual Planned preventative maintenance of the extensive BEMS system to the four IBM buildings in Dublin City...”

Sirus have been the service provider for BMS & various Mechanical Systems in IBM for Many years.

Sirus have also been involved in the continuous upgrade of the systems.

We offer a 24hr emergency callout service on top of the annual Planned preventative maintenance of the extensive BMS system.

The various sites all have their challenges, due to the nature and importance of their role in the IBM organisation.

The buildings range from office environments, Manufacturing and Data Centres.

Sirus also carry out turnkey projects in each of the buildings. Sirus have worked alongside the designers and building managers to deliver a quality product across the various services we offer.
