

Trinity College Dublin

Campus HVAC maintenance

“The Contract requires full time on site technicians to cater for the PPM services of the plant; these technicians are backed up by SIRUS mobile and specialist service teams as required...”

Trinity College Dublin (TCD) is recognised internationally as Ireland’s premier university and is ranked 14th position in the top 200 European universities by the QS World University Rankings.

TCD campus, is located in Dublin City Centre, occupies some 51 acres (including the Trinity Technology and Enterprise Campus).

Sirus are the current service provider for all Air Handling systems, A/C and chiller systems, across the entire Trinity Property portfolio.

The buildings, in excess of 220,000m², are spread over a number of sites in the Dublin area and include historic architecture and state-of-the-art modern facilities.

Sirus have also provided the service for all the fume cupboards in all of the trinity locations including Air validation.

The Contract requires full time on site technicians to cater for the Planned Preventative maintenance of the plant, these technicians are backed up by our mobile and specialist service teams as required.

Sirus also offer a 24hr callout facility for critical plant items.

Our Engineers work closely with the Building management team to limit any disruption to the daily function of each of the buildings whilst servicing is being carried out.
